
Coronavirus Mutation: Urgent - How KF will Respond Worldwide

Excerpt from 317th Knowledge Seekers Workshop, February 27, 2020
Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription. (Summary by KF Brazil)

SUMMARY:
In today's workshop we would like to raise a number of points in respect to the Keshe Foundation (KF) work with the virus and go over them step by step. It's important to explain in more detail for the Knowledge Seekers (KS) on how to protect themselves through the modes of prevention and disinfection. The KF has developed systems that can be deployed and used to cover a number of countries as they are getting produced. Tonight at 9 PM will be an emergency meeting for the support groups and everything else that is being built up in Iran to handle the recent outbreak. The virus has been carried from Iran to Italy, and now Brazil has received their first infected person from Italy. We are looking for the Italian community to come back to the KF so that we can setup support systems to help handle the situation there. The stage of recovery is already gone, so if you don't have the virus by now, it means you don't need to recovery, but you need to learn how to prevent getting it.

Deliberate Spreading Among Iranian Leaders:
We have heard that a number of world leaders have been put away in safe and secure positions, and will probably not be seen in public for a long time to come. In addition, many ministers have been locked behind their offices and will run the government from behind closed doors. The number of countries in this situation is increasing and if they loose their ministers and head of armies, then the governments will run into problems. The assistant health Minister in Iran has been taken ill in the past few days. Because of the way the virus has been deliberately spread, many of the Iranian ministers are being held in quarantine. Just before elections it is tradition for all the Moslems of Shia background to visit a particular shrine. They deliberately sprayed the

shrine so that when the people touched it, they would carry the virus with them. It was a deliberate act and in due course we'll tell you how, and by whom it was done. After touching the shrine, then all these ministers met with each other last weekend for political campaigning. So now the infection has spread throughout the highest ministerial level of the parliament. The KF has reached out to help and we expect the different KF organizations across the world to emerge in position.

KF Procedure in Iran:

The procedure that the KF Iran has created is to setup a central "all leading group" which oversees KF leaders in every district in the whole of Iran. All states in Iran will be covered. Iran has responded immediately with hundreds and thousands of what we call, "Gans availability", or people who are ready to deliver Gans to those in need. The channel runs 24 hours a day and people literally come online and ask for help, and within hours, materials are delivered to them, and then they are taught online how to make it for themselves. I was on call until about 4 AM this morning and we estimated that we saved many, many lives. Children who know how to use the Internet came online to ask help for themselves, their families, and other people who are infected.

The full reports are showing that use of the Gans water results in an immediate reduction in the fever and the loss of the pain. We are gathering all of these people to come and give their testimonials to the government in the next few days. By tomorrow morning we expect a number of hospitals in Tehran to start using the technology to prevent and to reverse the virus. It's the job of the Iranian government and officials to announce this development. And hopefully if they do, we'll let you know which hospitals and doctors are using the technology so that you can go there and get immediate help. We expect the KF around the world to make the same kind of setups in their own countries, what we call, the "immediate response group." In Iran they are well setup and they have doctors and people responsible for each district, able to

respond the minute the calls start coming in. When they get a request, they get in touch with the people in that district who are carrying the Gans water, and they deliver it to the people in need. The procedure is very simple, all you need to do is to setup a central headquarters of operation, and then in each area you create another headquarters that reports back to the central one. This is done in each state, and can be broken down to cities and major cities in that district.

The number of infected people worldwide is beyond the understanding of the present time. The figures you see reported on the charts for the nations, is just for public consumption. The reality is far worse and it can't be discussed because most of these ministers and heads of state have never been trained to save their nations. They have only been trained to spend their nations money in a way that they should not have, and now there is nothing to support this crisis. Now the biggest problem we see is coming from the doctors, the elites, and the stupid educated, what we call, specialists who can't understand what we are presenting because it wasn't in the books when they went to school 50 years ago. Their technology hasn't gone any further.

The reality now is that people are coming online, and I literally go online and teach them step by step, what to do, what to expect, and how to set things up to protect themselves. We have cases of children going online, the mother and father and family have all been infected, and they start helping the whole family. Last night and this morning, while I was helping online, it brought back to me beautiful memories, and is what we call, dejavu, or the repetition of what we have seen in the past. For me it went back to the 1970s and 80s when I was a student in Queen Mary's College, being trained as a nuclear physicist. In many parts of my education, the knowledge was so elite, that it was literally coming hot off the press. I used to sit across the table, one on one with my professors. They were teaching me from their own books, research, and even their own PhD research. There was no book for me to read, they were teaching me form their own experience and knowledge and it was for

me to carry it forward. The teaching was specialized, how to, for example, control nuclear reactors, or what to do if a nuclear bomb was running out of control, or what we have to do if one hits a nuclear power station. The strange thing was that as I was helping this little girl online, and I was having the same feeling as back then, there was just an age gap of 50 years. At that time I was in a position where I sat across from my professors and was being taught the edge of science that nobody could imagine. At that time the nuclear technology was so advanced, and now here I am teaching youngsters the new science to save their own lives, one on one. You can see their gratitude and kindness, and how they absorb and observe what we call the plasma technology. However, this technology has a big problem, it is too advanced for humanity, because humanity was kept in the dark for so long.

People Change when no Other Hope:

To all KF supporters, wherever you are, equip yourself with Gans waters as much as you can to help yourself and others. People will call you back when they realize they have no other hope. We had a case last night on the emergency backup in Iran, a gentleman came in and made a lot of accusations that this is a money making scheme and you have done this and that, and you are frauds and the rest of it. He even insulted all the backup teams and went into the private Chats. About 2 or 3 hours later he called back, crying, that he wants help for his mother, apparently she got infected. This is how people change, and this is the shape of the things to come.

This technology would have already been well used and have been spread across the planet by now, if it hadn't been for a group of pedophiles who tried to steal the technology, and for some heads of nations who were leading these pedophiles, with what was called, the "free-energy" group, and if we hadn't stopped them they would have killed many more children. But today, unfortunately or fortunately we are in this position and we have to make the best of it.

Presently, our total loss from the virus in China runs beyond 5 million. We do not exaggerate. I have been told that they have confirmed that China passed 1 million some weeks ago, and now the losses are heading for the 5 million mark. The Chinese government reports no contamination in some 20 plus provinces, but are still having increases where it originally broke out. From our own figures we can see that the situation is Iran is becoming crucial, and Italy is next in line. We estimate that Italy will loose massive numbers in the coming weeks.

India Bypassed until Trump Goes Home:

From all the tracking and the data of this disease we can see that it is tailor made, and you have to be prepared for such an eventuality. It's beyond deciding who gets infected and who gets benefited by it. So what happened is, first China got hit, then Iran, and now Italy. But strangely enough India which is in the direct pathway to Iran but is untouched. Coincidently, the American President is supposed to be in India for a big transaction to swipe off the wealth of that nation, and while he is in India, there are no reported cases. India is fabricating figures and is being controlled until after the President siphon's off their safes, and central banks through contacts in the name of his own companies. It's clear that he wants to change the headquarters of his empire to India. This will be disclosed later on. As I explained in part of the teachings very recently, the US is going to get hit very bad. We see the same conditions taking hold in America by all of those who flew in from Italy. Western Europe will be covered in the next 2 weeks. The problem with the KF supporters is, that you were, 'caught sleeping on duty'. Be prepared this virus is taking hold beyond imagination. Back to what I said at the beginning of this teaching, the reality is, every man is on his own. You are the last man standing.

Their Plan Backfires:

Originally their plan was only just to hit and disable, and then start a new kind of war to take over. The infection in Iran was supposed to damage the

Iranian structure so that the American military could attack at the point of weakness. But the problem is deeper and the one thing that these people didn't calculate, as I explained in the other teachings, is that these two nations, Iran and Italy share the same flag, but in different directions. They have tailor made the genes into this virus, but they didn't know that the genome base in Iran and in Italy is very close, so the Italians picked it up. Unfortunately the Italians took it from the Iranians, and now they have taken it across the world. It's not the Chinese now who are spreading it, it's Italians and the Iranians in the Middle east. Many Italians live in the Americas, and especially in North America. We saw in the last few weeks, that every Chinese restaurant in the western Europe and most of the world became empty because people were afraid. Now we'll see the same with the Italian pizzerias. Then where do we go next. Shutting borders and trying to hold it back has started. The problem now will be that the nations will start isolating themselves. It was not calculated to be this way, but this is how it has turned out. The biggest loser in this game will be the USA. You'll understand why in the next 4 weeks if the events take place the way we see it.

Expect Massive Natural Disaster in China:

We expect a massive, a massive natural disaster in China. It will be followed with floods and probably with droughts. The only problem is nobody will be there to help, as everybody will be afraid to get the infection. The same can be said for Iran and it will go that way right through to Europe. Now nobody will be prepared to send their people to save the others. Again it has become one nation, all standing for themselves.

Brazil has to Prepare:

The state of Brazil has had its first report. Soon we'll make an announcement on the Brazilian Chat lines regarding supporting Brazil. The Brazilian KF, you have to setup the support system the way we have done it in Iran. You setup an emergency team, and through that team you will find out those who are holding the Gans's, in which state and how fast you can get to the KS. The KF

Brazil has to become active, directly, with all the Brazilian supporters who are there and a structure has to be setup that can carry this out. You need to find out all of the doctors who are working with the technology and where they are located.

No Mortality expected Among KS:

It is very important that all of the KS follow the procedures we are about to present in this workshop. The KF management team is following it and if you follow you will also be safe. We don't expect any mortality within the KF across the world for those who are familiar with and use the Gans's and have made the Cup of Life.

To all Knowledge Seekers, make sure you have everything you need for yourself and enough to give to the others. We'll open a channel to each country. It's important that you do not open a separate channel in your country. Every channel must go through the KF so that we can monitor it and make sure that the people are getting the correct help. Now that people are in a panic we need to control it. We do this because we have found that even the old Knowledge Seekers, and I do not know how, but they cannot always give the correct support and right information. So we'll try to give our support and put everything into a worldwide central organization, what we call, the 'Central Committee Organization of the KF.' We want to give the Italians a chance to come back in under what we call, "Italy support." As you speak in Italian, this will allow the Italian public to know where to come for help. We'll monitor it and come in when you need help. We'll set this up by today. Don't setup anything which is not under KF control, because we need to be able to support you. This will be announced internationally in the coming days, once we start controlling and holding the conditions in Iran, which should be within the next 7 days.

The Universal Sepah:

We are planning for the Iranian Sepah teams to distribute the technology across the planet in groups of 30 to 50 officers. This means that the only

people who will travel into China during disaster, or into Italy, will be members of the Sepah, equipped with the latest knowledge and technology to support the nations. As we said, Sepah is universal, and we'll bring this beauty of Iran to all the nations. It is important for the Iranian central government and the Iranian Sepah to be ready to deliver this within the next 2 weeks. The Iranian Sepah will be part of the international rescue teams, and most probably the only international rescue team, which will carry all the equipment necessary to support hospitals, governments, and officials, until they can train the officials in the right way. This is the only way we see, to use such an elite force, which is dedicated to the safety of a nation, to also be used to safeguard the international borders and governments.

These are not mercenaries, these are men of peace, trained to reverse the conditions of what we call, Coronavirus, which was spread by the Americans. As usual, the Iranians have to clean up the mess that these people create. We'll announce the collaboration with the Iranian government and which of the groups of the Sepah of Iran. The foreign offices will be contacted nation by nation, and the latest equipment will be flown in to deliver the technology to safeguard the nations and then they'll do mass teaching of the KF technology for the country's development.

One of the most important things for the KF members is, as such, do not dismiss anything. Do not dismiss a single call, do not dismiss a sweat.
